

WHAT YOU NEED TO KNOW ABOUT LOWERING SPRINGS

STUNNING LOOKS AND A SPORTIER RIDE

Springs are an essential part of your car's suspension system. They absorb much of the initial road shocks. SPAX SSX spring kits are ideal if you want to lower your car to get cool looks and a sportier ride.

Most lowering springs can give your car cool looks and a sportier ride. **SPAX Lowering Springs deliver MUCH MORE!**

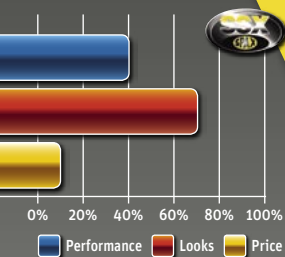

Performance Lowering makes your car less top heavy. When combined with SPAX optimised spring rates, you get less body roll, reduced bottoming out and better handling. Most SPAX spring kits are progressively wound. This offers a softer ride at low speeds and a stiffer ride at high speeds, when you need it most.

Quality SPAX springs are designed, manufactured and tested to German TÜV standards, the toughest in Europe. They are made using only the finest Chrome Silicon steel. They are shot peened, oven cured (to prevent sagging) and epoxy powder coated (to give the best possible corrosion resistance).

Safety Reduced body roll, predictable handling and a dependable quality product will help keep you and your car on the road.

Value SPAX's massive buying power, superior manufacturing systems and "Factory Direct" pricing allows you to buy a premium product at what is often below the price of a "budget brand".

WHAT YOU NEED TO KNOW ABOUT IMPROVING HANDLING

STUNNING LOOKS AND HANDLING TO MATCH

Springs and dampers combine to form the suspension on your car. The springs absorb much of the initial shock and the dampers control the "bump & rebound" forces on the car. Your car's original suspension will be a compromise between comfort and good handling, with the emphasis on high comfort.

SPAX VSX suspension kits will significantly improve the cars handling and looks and give a sportier ride.

Some suspension kits may give your car cool looks and a sportier ride. **SPAX VSX Suspension Kits deliver MUCH MORE!**

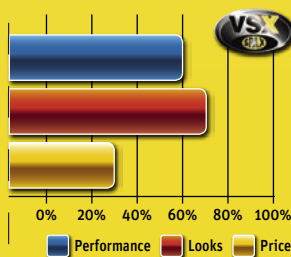

Performance SPAX VSX Kits are not just up-rated versions of the car's original suspension. SPAX engineers have developed VSX dampers that are perfectly matched to SPAX lowering springs. The result is optimal control and handling. VSX dampers are up-rated, shortened and pressurised with Nitrogen gas. This gives superior low speed ride quality and enhanced high speed performance, when you need it most.

Quality SPAX VSX kits are designed and manufactured to the highest German quality standards. SPAX's dedication to quality means the kits won't let you down when you need them most.

Safety Dampers and springs are safety critical parts of your car that can save your life. Improved handling and shorter stopping distances lead to a safer and more enjoyable drive.

Value SPAX's massive buying power, commitment to value and "Factory Direct" pricing allows you to buy a premium product at what is often below the price of a "budget brand".

(Performance - Looks - Price)

SPAX has been designing and manufacturing performance suspension for over 50 years. We believe that when you do something for long enough, you get it right.

SPAX was chosen twice by Thrust to break 2 Land Speed Records and the sound barrier. We think that at 771 MPH, only the best will do.

SPAX only makes suspension for cars. We do nothing else and we are passionate about what we do.

SPAX has been voted the best value, coolest brand, according to independent market research. We agree.

SPAX products are manufactured under stringent quality control procedures that must comply with TÜV standards, the highest European Legislative Certification.

All SPAX products come with a comprehensive 2 year warranty.

All SPAX dampers are gas pressurised. VSX dampers are filled with nitrogen and all adjustable PSX AND RSX dampers are filled with high pressure Krypton gas to further enhance their performance. Krypton's thermo-dynamic properties ensure there is no fading of the damping action. Low speed ride quality and high speed performance are BOTH improved.

RSX COILOVER kits now incorporate Stainless Steel height adjusters to ensure that you can adjust the ride height for many years, without the risk of corrosion and seizure. We use only 100% Top Quality Stainless Steel.
